## For Anti-inflammatory & Immune Support

### What is Black Hoof?

Black Hoof mushroom (AKA Meshima) goes by many names including phellinus linteus and sang hwang. It gets its name "black hoof" because it sometimes resembles a horse hoof. Like many medicinal mushrooms, Black Hoof is packed with special carbohydrates called polysaccharides and beta-glucans. This offers powerful immune-boosting and anti-inflammatory properties.

### Black Hoof Health & Wellness Benefits

#### Helps relieve skin conditions

Has an effective natural treatment for atopic dermatitis, due to its inhibitory effect on the immune cells responsible for triggering inflammation that causes eczema.

#### Combats chronic inflammation

Contains bio-active compounds & antioxidants to supply a natural solution to combating chronic inflammation that could lead to heart disease, diabetes, allergies, arthritis, etc.

#### Improves diabetic symptoms

Contains polysaccharides, hispolon, and other compounds that can improve insulin production and defend against autoimmune forms of diabetes.

#### Defending against & treating cancer

Real immunomodulatory activity provides potentially powerful anti-cancer and anti-tumour properties. Used in Japan to treat breast cancer.

#### May block allergy symptoms

May block allergy symptoms by balancing the immune system and reducing inflammation.

#### Additional benefits

- Treats diarrhea and upset stomach
- Protects against certain forms of liver damage
- Supports the immune system
