

UNLOCK YOUR IMMUNE'S DEFENCE

FOOD SUPPLEMENT

IMMUNE BOOSTER

100% PURE | 600MG/SERVING | 60 GEL CAPSULES

ULTRA POTENT

WELL-BEING IMMUNE-RESPONSE

What is Immune Booster?

Your immune system consists of a complex collection of cells, processes, and chemicals that constantly defends your body against invading viruses, toxins, and bacteria. Helping to regulate the immune system is one of the greatest known superpowers of all medicinal mushrooms. We have developed our Immune Booster with the natural healing power of five medicinal mushrooms that have shown to benefit immune health: chaga, turkey tail, lion's mane, reishi, and cordyceps.

Immune Booster Health & Wellness Benefits

Chaga fights inflammation

Positively impacts immunity by reducing long-term inflammation linked to conditions like heart disease and rheumatoid arthritis.

Turkey Tail is rich in antioxidants

Contains a wide variety of phenol and flavonoid antioxidants to help promote your immune system health.

Lion's Mane protects against pathogens

May boost immunity by increasing the activity of the intestinal immune system, which protects the body from pathogens that enter the gut through the mouth or nose.

Cordyceps helps body resist diseases

Shown to increase proinflammatory cytokines to boost the immune system. May combat existing diseases, as well as enhances the body's innate ability to resist new diseases.

Reishi affects genes in white blood cells

Stimulates white blood cells (essential for fighting off harmful bacteria or viruses) to help fight infections — from minor colds to serious illnesses.

Additional benefits

- May help fight colds and flu
- May have ability to fight cancer cells
- Provides daily immune support
